

Best Practices ~ WIPER

Cleaning up the Environment One Room at a Time

1

2

To Wipe:

The most efficient and effective way to use a wiper is the '2 - Fold Method'

1. First - fold the *Perfect*CLEAN wiper of choice in half
2. Second - fold the wiper in half again
3. *The result:* Eight - palm sized cleaning surfaces
4. Mist the cloth with water/cleaner/sanitizer/disinfectant and wipe (***do not mist the surface to be cleaned*** – chasing fluid around the surface is wasteful and takes more time and effort)
5. When one cloth surface becomes dirty or overloaded, turn over or refold cloth exposing a clean surface.
6. Mist and repeat until all 8 surfaces have been used.
