## CASE SAVER

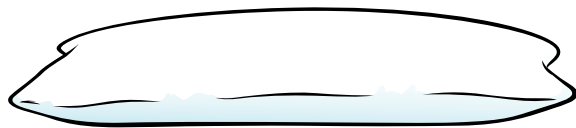

The Pillow Factory's Case Saver™ program allows more time for the work that matters most, patient care.

The Case Saver compression process removes air from pillows, allowing a smaller case to hold more pillows. And a convenient dispenser feature is ideal for tight storage areas.

The compression method allows quick return to full loft within one hour. This all adds up to consideration for freight cost savings, staff time to handle cases, and space savings in delivery areas.

Fully Compressed

Partially Expanded

Fully Expanded

Our Fresh Start® personal pillows set the quality and performance standards for the entire industry. Patients will find maximum comfort on these single-patient-use pillows with breathable non-woven covers, and staff can trust that fresh pillows are ideal for cross-contamination concerns.

Furthering our commitment to customer inventory management needs, our Case Saver™ program assists in saving time, space and waste. Pillows are individually compressed, wrapped, and dispense easily from high capacity cases.

- Soft and breathable non-woven ticking
- 100% Recycled ecoCLOUD® fiberfill is environmentally responsible
- Individually wrapped and compressed for clean, simplified storage
- Convenient dispenser-box packaging
- Easily configured for propping

## Reusable Pillows

Choosing the right pillow is more important than ever before when considering increased patient satisfaction, with necessary performance and protection. The Pillow Factory offers the largest selection of reusable pillows in the market, using high-quality, differentiated materials to meet every need. Our pillows stand up for durability and protection without stepping down comfort. Your patients will rest in comfort and support, while your Materials Manager will enjoy the value of multiple-use pillows. Environmental Services and Infection Prevention will appreciate the benefit of soft surface products that can withstand appropriate cleaning and disinfection.

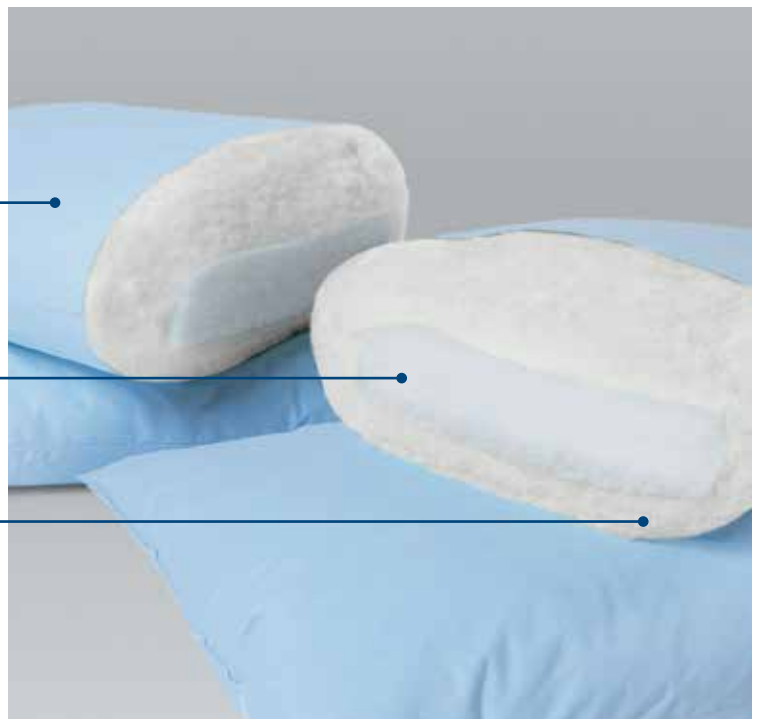

There is nothing more important to the patient and their experience than the items that touch their body. Patients need just the right combination of the comforts of home and healthcare support.

Fluid resistant and fluid proof covers easily wipe clean for extended pillow use.

The SRC<sup>®</sup>, Soft Resilient Core, system extends pillow life by maintaining a supportive structure longer.

100% recycled ecoCLOUD<sup>®</sup> fiberfill is environmentally responsible.

## RevolutionaryCARE® Pillows

The RevolutionaryCARE pillow will revolutionize patient expectations for years to come. This soft and supple reusable pillow supports optimal comfort while providing exceptional value and longevity. With quick loft recovery, an amazing feel, and unique barrier performance, this pillow will provide all of the memory, without the foam.
