

REUSABLE PILLOWS

Fluid resistant and fluid proof covers easily wipe clean for extended pillow use

SRC® system provides patient support and resiliency

100% recycled fiberfill is environmentally responsible

The Pillow Factory® family of reusable pillows feature the SRC®, Soft Resilient Core, system as well as high quality fluid resistant and fluid proof covers which can be easily wiped clean.

SRC® pillows add support and resiliency to resist wear, crumbling and breakdown while providing superior patient comfort. Use after use, these pillows retain about 65% of their original height, resulting in better value per patient day.

We take pride in the fact that our pillows are made in the United States with recycled materials. 100% recycled fiberfill is used in all pillows reducing the need for additional resources to be taken from the earth.
