Encompass Group Introduces the Thermoflect® Transport Cocoon

McDonough, GA–(April 1, 2011)– Thermoflect® Heat Reflective Technology helps maintain normothermia and prevent hypothermia by reflecting and containing the patient’s infrared heat. It creates a warm cocoon of air and prevents convective heat loss (wind chill).

Maintaining normothermia and preventing hypothermia is essential to improved outcomes and reduced risk of surgical site infections.

The Thermoflect® Transport Cocoon is specifically designed as the first line of defense for trauma patients. It features a super absorbent core to contain and measure lost fluids, a full-length Velcro closure to allow easy access and is individually vacuum packaged for storage.

For more information on this and other Thermoflect Heat Reflective Technology solutions visit www.thermoflect.com.

About Encompass Group

Encompass Group, LLC (McDonough, GA) is one of the leading manufacturers and marketers of reusable textiles, professional apparel, and disposable and single use medical products. For nearly a century, Encompass has been helping health care and hospitality organizations create safe and comfortable environments for patients, staff, residents and guests. By focusing on innovation, product knowledge and customer service, we strive to always meet the needs of our clients and surpass their expectations.

Our people and services, combined with our comprehensive distribution and manufacturing facilities, allow Encompass to offer our customers the broadest spectrum of textile related solutions in the health care marketplace today. For more information, contact Encompass Group Vice President, Marketing at joe.przepioraka@encompassgroup.net, 800 797 1107.
